

AI ENGINEER INTERN

JOB OVERVIEW

Location: Dong Hoa, HCMC (formerly Binh Duong) – near HCMC National University Village

Working Hours: 8:30 AM – 5:30 PM (Monday - Friday)

Position Type: Intern

This position is for candidates who want to participate in developing core AI modules for the company's Multi-Agent AI platform, focusing on advanced technologies such as LLM and RAG.

RESPONSIBILITIES

The candidate will participate in developing AI modules for the company's Multi-Agent AI platform, including the following tasks:

- Build and develop workflows for processing user requests, document analysis, RAG, and AI Agent.
- Implement, evaluate, and optimize LLM models (calling API or using self-hosted models).
- Participate in building backend API for the AI system (FastAPI).
- Data processing: document parsing, embedding, vector search, data preprocessing.
- • Evaluate AI output quality, optimize prompts, and optimize model inference flow.
- Coordinate with DevOps to run AI services (Docker, Linux, logging).
- Participate in reviewing technical documents, proposing solutions, and improving the system.
- Report progress according to sprints and work towards objectives.

REQUIREMENTS

- 3rd or 4th year student in Computer Science, Information Technology, or a related field.
- Proficiency in **Python** (data processing, clean logic, API calls/JSON) and familiarity with **FastAPI** (building/maintaining APIs).
- Strong foundational knowledge of **AI/LLM & Machine Learning** and Deep Learning including **RAG**, embeddings, vector similarity, and ML evaluation concepts.
- Clear understanding of **LLM mechanics** (tokenization, context window, inference).
- Proven practical experience with **1-2 real-world AI/ML projects** (product, academic, or freelance).
- Ability to perform **basic DevOps** (Docker, Linux commands, log reading) and adhere to **Git/GitLab workflows** (MRs, basic review, simple conflict resolution).

BENEFITS

- Receive in-depth training on AI/LLM/RAG technologies.
- Direct guidance from experienced AI engineers.
- Participate in real AI projects that impact the company's products.
- High opportunity to become a full-time employee after the internship period.
